

LAST CONTRACTOR CE CLASSES for 2010

NOVEMBER

♦ Monday - Nov. 15, 2010

Course # 539 QuickBooks for Contractors Instructor - Martin Roth
9:00 am - Noon *Tackle job related issues such as customer setup, managing inventory, estimates, sales orders, invoicing, entering and paying bills, payroll, and preparing various reports using the computer.*

Course # 540 Delays, Disruptions, Accelerations Instructor - A.J. Manion
1:00 - 4:00 pm (Commercial Law Part 1) *In construction, anything can happen. Who is responsible, what does it cost and who will absorb those costs?*

♦ Tuesday - Nov. 16, 2010

Course # 541 Recycling Construction Debris Instructor - Jim Daniels
9:00 am - Noon *Communities can sustain themselves over time. Learn about setting up an Eco-Depot, where non-traditional recyclables can be marketed to avoid going to the landfill.*

Course # 542 Indiana Building Code (Commercial) Instructor - Craig Wagner
1:00 - 4:00 pm *Brush up on the highlights of the changes in the current Indiana Building Code for Class 1 (commercial) structures. We will cover various significant amendments.*

Course # 543 Light Wood Frame Construction Code Instructor - Craig Wagner
5:00 - 8:00 pm *Get an overview of the Indiana BC regulations. The class will focus on component sizing, connections, seismic issues, load transfer, bracing, and engineered components.*

DECEMBER

♦ Monday - Dec. 20, 2010

Course # 544 Dealing with the Problem Project Instructor - A. J. Manion
1:00 - 4:00 pm (Commercial Law Part 2) *In construction, anything can happen. There will be discussion of project delivery methods, contracts and claims.*

Course # 545 Indiana Residential Code Chapters 3 & 4 Instructor - Craig Wagner
5:00 - 8:00 pm *The class will cover the building planning requirements of Chapter 3 with an emphasis on the seismic requirements that are unique for this part of the state. The study on Chapter 4 will cover footings, foundation walls and foundation anchorage, and the seismic issues.*

♦ Tuesday - Dec. 21, 2010

Course # 546 Indiana Residential Code Chapters 5 - 11 Instructor - Craig Wagner
9:00 am - Noon *The class is focused on the framing of dwellings and will cover the seismic requirements that are present for this area. Floor construction is covered in Chapter 5 and wall framing in Chapter 6. Wall covering, roof system construction and roof coverings are covered in Chapters 7-9. Chapter 10 covers chimney and fireplace construction and the section on Chapter 11 gives a brief overview of energy requirements.*
